Art Unit: 1723

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "3" in figure 1, "4" in figure 2. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to because Figures 5A and 5B need to be labeled separately. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered. References on pages 5 and 12 of the specification have not been considered.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 6-8 provide for the use of the device of claim 1, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Art Unit: 1723

6. Claims 6-8 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

7. Claims 1-5 and 9 are allowed.

8. The following is a statement of reasons for the indication of allowable subject matter:

J. Porath et al., *Int. J. of Biochromatography*, Vol. 3, No. 1, pages 9-17 (1997) (hereinafter referred to as Biochromatography reference) is considered the closest prior art.

Biochromatography reference teaches a chromatographic affinity column using a gel (agarose) as a support to which an affinity ligand (Cu-iminodiacetate) is coupled (see page 13, last paragraph) and appears to have a molecular cut-off of 5kD – 50kD. However, the affinity column of Biochromatography reference does not have a polymer grafted onto the gel (agarose) which in turn is coupled to an affinity ligand. A similar column having no grafted polymer is compared in the specification as comparative examples wherein the column does not have specificity for beta2-microglobulin while the claimed affinity columns in claims 1 and 3 have specificity for beta2-microglobulin (see page 9, lines 1-11; page 9, line 31 – page 10, line 19). Claims 2, 5 and 9 depend on allowable claim 1. Claim 4 depends on allowable claim 3.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Kim whose telephone number is (703) 308-2350. The examiner can normally be reached on weekdays from 7:00 AM - 3:00 PM.
